

## PIPEWORK SPECIALISTS

LWA Engineering is a specialist in pipe welding with significant expertise in high quality piping systems of stainless steel, nickel based alloys and plastics such as CPVC through to HDPE, covering a range of applications across the marine, power, chemical, oil & gas, mining, brewing and water related industries.

## VERSATILE FACILITIES

LWA Engineering has a fully equipped fabrication workshop with the latest welding equipment. The workshop is set up for pipe spool fabrication machining but is adaptable for all structural types of work.

## NOTABLE CLIENTS

LWA Engineering has built and commissioned intricate and complex projects for a range of local and international clients who include: Alstom Power, Christ Kennicott, APA Group (natural gas), BRL Hardy, APV, Coopers, United Utilities Australia, Orica Water-care, Leighton Contractors and HBM Packaging Technologies, to name a few.

Some of the projects undertaken in the past are:

**Project: Kogan Creek Power Station**

Value: \$2.5million

Type of Work: Pipe Work

Main Features: Condensate Polisher and Water Treatment Plant

**Project: QNI**

Value: \$500,000.00

Type of Work: Pipe Work

Main Feature: Desalination Plant

**Project: NATROCARE**

Value: \$25,000.00

Type of Work: Pharmaceutical Pipe Work

Main Feature: Orbital Welding

## RANGE OF SERVICES

Our clients will also testify our ability to complete projects on time as well as being actively involved with them in the capacity of engineering consultants, contractor/fabricators and quality control inspectors.
